

No through screws,

cover nuts

or external screws.

That's why

Saguatti Knob

is more intelligent.

Saguatti solves, thanks to an innovative patented technical solution, the problem of fixing door knobs. Our fixture system is a decisive step forward for door accessories. With Saguatti system, unsightly elements are eliminated, and knob fixing becomes easier and simpler. Through screws, covers, external screws are no more needed, considerably improving the overall look of the knob. This solution is also important for thick security doors. Saguatti knob can be fixed on any door, unlike other knobs which can not be mounted everywhere or, at best, are not convincingly secure.
